

Serial	Question	Summary of Response Provided During Webinar
35	The Project Rose feedback from you have provided please could you clarify if there any limits to the amount of words we can use in our response to each question?	The feedback form does not have word count limits.
36	How will feedback form be reviewed/accessed and by whom?	The feedback forms will be reviewed by the ROSE Project Team, summarised and shared with the ROSE Board. The feedback will help the Project Team to take the project forward in to the Assessment Study stage, and to inform the Initial Gate Business Case.
37	If Wellington Barracks at 3.75 hectares is too small for all mounted troops to be colocated at one site, how large a site would be needed?	See Serials 4 & 29.
38	What is the vehicle and likely timescale for primary legislation to allow the sale of the Hyde Park Barracks e.g. a separate Act of Parliament?	See Serial 14.
39	Why is the DIO/GVA not including the return of some or all of the Hyde Park Barracks site to open parkland among its options?	The options that are being considered relate to the provision of infrastructure facilities to support the Army's delivery of State Ceremonial & Public Duties and the need to provide value for the public purse. The provision of open parkland across the entire Hyde Park Barracks site would not meet these objectives.

40	Have you prejudged the outcome of the current process given that you are not considering the return of some or all the Hyde Park Barracks site to open parkland among your options and are only consulting developers in a 'closed' process?	No decisions have been made on the future of Hyde Park Barracks. The engagement event, via the webinar, was open to a range of interested stakeholders, and it is intended that any future engagement events would be similarly open. See also Serial 39.
41	Why didn't the DIO/GVA webcast highlight to developers the planning and other constraints on the Hyde Park Barracks site including the important role of the Knightsbridge Neighbourhood Plan?	A high level summary of the Town Planning context, as associated with the Hyde Park Barracks site, was presented during the webinar.
42	Which organisations and people are involved in the Project ROSE Board?	The Senior Responsible Owner and Chair of the ROSE Board is the MOD's Director Commissioning Services. Board members include two senior members of the Army, three members of the DIO Senior Leadership Team, and two senior representatives from Defence Resources and Scrutiny.
43	What independent scrutiny will there be of the 'Assessment' and subsequent stages of Project ROSE e.g. by Parliament, the London Assembly and/or others?	The Assessment Study will determine a preferred solution that will inform the Initial Gate Business Case (IGBC). The MOD's internal Scrutiny and Approvals process will be applied to the IGBC first; these stakeholders being independent of the ROSE Project Team. Beyond that, the IGBC will then be subject to the Cabinet Office / HM Treasury Scrutiny and Approvals process; this considers a broader approach and looks at cross-government practices and efficiencies that might be brought into the programme. The Main Gate Business Case, in due course, will be subject to the same scrutiny and approvals processes as the IGBC.

44	What engagement will take place with which stakeholders and when between 18 March 2017 and Spring 2018?	The stakeholder community interested in Project ROSE is large and diverse. Internal to Government stakeholder engagement will happen routinely, varying from monthly to quarterly as appropriate, and will provide updates on project developments. For external to Government stakeholder engagement, DIO will take into account the responses received from feedback forms on engagement frequency and on the preferred styles of communication. Industry representatives are also welcome to engage with DIO on a confidential basis if there are ideas or innovations that they wish to share with DIO. All major announcements will be posted on the ROSE Webinar portal which remains accessible to all until 28 Feb 2018.
45	Is the Hyde Park Barracks site currently the only significant and active operational base for the Army in Central London?	Sites used by the Army in Central London include Hyde Park Barracks, Wellington Barracks, Regent's Park Barracks and Horse Guards.
